

Aufbauanleitung/Assembly Instruction/Instructions d'installation

Model:KUE003sz

Electrical conducts:

- To reduce the risk of electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
- Before you connect the appliance, ensure the voltage rating on the type plate corresponds to your mains voltage (type plate is located on the inside of the unit).

Technical conducts:

- Repairs to electrical appliances should only be performed by qualified personnel. Improper repairs may place the user and/or equipment at serious risk.
- Do not operate this appliance with a damaged plug or cord, after a malfunction or after being dropped or damaged in any way.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified people in order to avoid a hazard.
- Do not push objects into any openings as damage to the equipment and/or electric shock may occur.
- If abnormal noise, smell, smoke or any other

failure is discovered during operation, turn off the product and unplug the power plug. Then contact the service center for repair.

- Do not remove the appliance from the mains power supply by pulling the cord; pull the plug.

Operational conducts:

- This equipment is not intended for use by people (including children) with reduced physical, sensory or mental capabilities or lack of experience or knowledge. They should be given appropriate supervision and instructions to use the equipment by a person responsible for their safety.
- This product is not a toy. Never leave the equipment within reach of children. Close supervision is required when using this equipment near children.
- This equipment is intended for household use only and should not be used for industrial or commercial purposes.
- Do not use this equipment for anything other than its intended use.
- Do not immerse the product in water or any other liquid.

- Always unplug the appliance after use and before any cleaning or user maintenance.

Environmental conducts:

- Ensure the equipment is not too close to heat emitting appliances or placed in direct sunlight.
- Do not use this appliance outdoors.

Other conducts:

- To prevent the fans from getting stuck: Towels, cloths etc. should not be put on the unit. If the fans get stuck, the engine will overheat and cause a fire.
- Keep the appliance away from fire and moist to prevent explosion and fire.
- Do not put the unit upside down.
- Do not switch between the cool/warm function abruptly. Let the appliance be in off mode for 30 minutes before you change the function.

Cooler box:

1. Indicators
2. Cold/hot switch
3. Eco/max switch
4. Cable cover
5. Air vent

Get started:

1. Remove all packaging material from the cooler box.
2. Make sure both eco/max and cold/hot switch is set to "OFF" mode.
3. Place the cooler box on a flat surface and connect the power plug to a wall outlet.

Note: The cooler box can also be powered by a 12 V power outlet. If desired, connect the 12 V cable between the power input and a 12 V power outlet.

4. Set the cold/hot switch and eco/max switch to a desired mode.

Note: Eco mode is not applicable when the cooler box is power supplied by 12 V cable.

Note: When the unit is in Eco mode, the cooler box keeps the current temperature. If you need more cooling, put the cooler box in Max mode.

Note: Do not switch between the cool/warm function abruptly. Let the appliance be in "OFF" mode for 30 minutes before you change the function.

5. Open the lid and place the desired beverages and food in the cooler box.

Note: We recommend that you pre-cool the beverages and foods before you place them in the cooler box for a more effective cooling.

Note: The hot mode is not meant to heat up beverages and food, but to maintain its heat.

Note: Do not switch between the cool/warm function abruptly. Let the appliance be in "OFF" mode for 30 minutes before you change the function.

5. Open the lid and place the desired beverages and food in the cooler box.

Note: We recommend that you pre-cool the beverages and foods before you place them in the cooler box for a more effective cooling.

Note: The hot mode is not meant to heat up beverages and food, but to maintain its heat.

Maintenance:

1. Unplug the power cable from the power outlet.
2. Let the cooler box reach room temperature if it has been used recently.
3. Clean the air vent and fan compartment with a moist towel to remove any dust.
4. Wipe the exterior and interior with a damp towel. Then dry it with a towel.
Note: Do not use any abrasive cleaning products or scouring pads to clean any part of the cooler box. This may damage its surfaces.
5. If there is residue stuck inside the cooler box, rub a moist sponge on the residue until it softens and rubs off.

Storing:

- Store the cooler box in an environment where it is not exposed to moisture, dust, direct sunlight or extremely high or low temperatures.

Product name	CRX 2.0
Power supply	Home (AC): 220-240, 50/60 Hz Car (DC): 12 V
Effect	AC: 8.6-60 V DC: 8.6-46 V
Power cord length	AC: 1.85 m DC: 2.65 m
Cooling capacity	18 °C lower than the ambient temperature
Cooling time for room tempered content	2-3 hours
Cooling temperature with an ambient temperature of 25 °C	16-20 °C
Volume	50 L
	72 cans
	1.5 L PET bottles
Included in packaging	- Cooler box - User manual
Size	600 x 410 x 420 mm
Weight	9.5 kg

Kundendienst
